> IP Video Surveillance with high performance management

It's not just video management software. It's XProtect.

Milestone Systems is the world's leading provider of open platform IP video surveillance software. For over a decade, Milestone has been leading the way in providing easy-to-use, yet powerful video management software (VMS) to over 75,000 customers worldwide.

All the Milestone XProtect products are designed with open architecture and are compatible with more IP cameras, encoders and digital video recorders than any other manufacturer. Because Milestone provides a truly open platform, you have the ability to integrate with today's best analytics and business solutions and to expand what is possible with future innovations. XProtect products have a wide array of impressive features to cover all your surveillance needs. Whether your installation is just a few cameras or several thousand, discover why XProtect is your best option for today and tomorrow.

open platform IP video
management software

The Open Platform Company

The XProtect Advantage

Comprehensive IP video management software delivering ultimate usability

Continually setting the standard in IP video management, XProtect products are:

- Open: Providing the widest choice of options for integration with computer hardware and video analytics
- Easy-to-use: All XProtect products provide easy configuration of cameras and user-friendly access to video
- Future-proof: All XProtect products easily scale to grow according to your needs to maximize the return on your system investment

XProtect® Corporate

Complexity made simple

XProtect Corporate is powerful IP video management software designed for large-scale, multi-site installations and supports an unlimited number of cameras, users and sites. For complete situational awareness and fast response, XProtect Corporate has easy-to-use clients integrated with interactive multi-layered maps and alarms. Built-in support for Smart Wall (video wall functionality with flexible configuration and independent hardware choice) enables seamless command center control. XProtect Corporate is software you can trust - providing edge storage and optimized video archiving to ensure uninterrupted video retention and ultimate peace of mind.

- Limitless: Milestone Federated Architecture™ and centralized management enables easy and efficient administration of multi-site installations
- Cost-effective: Significantly reduces the cost of storage with multi-stage video storage management and data grooming

XProtect® Enterprise

Feature-rich and ultimate usability

XProtect Enterprise is designed for medium and large-scale installations and supports an unlimited number of cameras, users and devices. XProtect Enterprise offers impressive administrative tools and a consolidated single-management interface that provides a coherent overview of devices, recordings and user settings. An ideal solution for multi-site deployments, XProtect Enterprise reduces the time and costs of managing large security installations with powerful features such as system configuration wizards and auto-detection of hardware.

- Future proof: With support for an unlimited number of cameras, you can grow the system according to your needs
- Flexible: Endless integration possibilities optimize your business processes

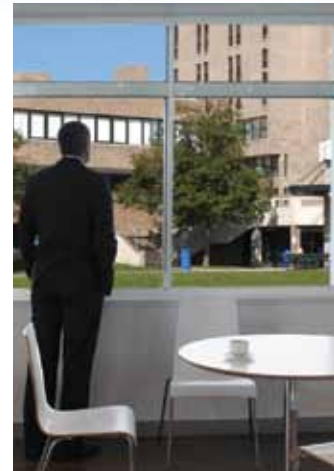

XProtect® Professional

Advanced features for mid-sized installations

XProtect Professional is designed for mid-sized installations and supports up to 64 cameras simultaneously. XProtect Professional is a complete solution for single-site installations requiring integration with business systems and video analytics. Easy-to-use software wizards swiftly guide you through the process of adding cameras, configuring video settings, scheduling recordings and administering user access.

- **Robust:** Advanced features for effective management of single-site installations of up to 64 cameras
- **Scalable:** Support for numerous third-party applications and plugins provide a broad range of integration options including Point-of-Sale (POS)/Automated Teller Machine (ATM) integrations, analytics tools, central monitoring and alarm management

XProtect® Essential

Brilliant Simplicity

XProtect Essential is designed for small businesses and manages up to 26 cameras. XProtect Essential provides a wide offering of video surveillance features to effectively and intuitively manage your single-site installation. XProtect Essential also provides high value with a flexible licensing model that allows easy upgrades and system expansion.

- **High-value:** Supports up to five concurrent users and the system is licensed to grow according to your needs
- **Quick to deploy:** Software wizards swiftly guide you through the process of adding cameras, configuring video and scheduling recordings

XProtect® Go

IP Video surveillance starts here!

XProtect Go is a free version of Milestone's market-leading software designed for small business installations and video surveillance in private residences. XProtect Go lets users experience the true benefits of IP video and the Milestone open platform - all for free. Seamless upgrade options make XProtect Go a risk-free entry into a reliable and secure IP video surveillance solution.

- **Single-server solution:** Perfect solution for homes or small businesses supporting up to eight cameras
- **Cost-free:** World's leading video surveillance software absolutely free

Key Features Comparison	XProtect Go	XProtect Essential	XProtect Professional	XProtect Enterprise	XProtect Corporate

Scalable multi-server solution				Yes	Yes
Centralized management					Yes
Flexible event rule wizard					Yes
Failover servers					Yes
Map function					Yes

(1) For installations with more than 250 cameras, Milestone recommends XProtect Corporate

(2) Using Milestone Software Development Kit (SDK)

(3) Using XProtect Analytics Framework

XProtect® Retail

XProtect Retail is a custom integration solution linking video sequences with relevant receipt and transaction data gathered from the Enterprise Resource Planning System (ERP). XProtect Retail provides full video documentation on transactions from devices such as Point-of-Sale (POS) or ATMs. The analytical business intelligence capability of XProtect Retail helps reduce shrinkage and fraud by identifying suspicious transaction patterns, like abnormal use of gift cards, discounts, black-listed credit cards, refunds, or coupons.

- Protect your business, customers and employees: Fraud and other shrinkage investigations are quick and efficient with video providing the ultimate verification and evidence
- Protect the bottom line: A flexible investigation tool that helps you detect continuously shifting fraud patterns

XProtect Retail integrates with the following Milestone IP VMS platforms: XProtect Professional, XProtect Enterprise and XProtect Corporate.

XProtect® Transact

XProtect Transact is a transaction management system that links and time synchronizes live video sequences with transaction data from virtually any source. Transaction data can be quickly searched by source, camera, date, time or free text and relevant video is easily extracted and played back. XProtect Transact enables you to effectively combat fraud and loss occurring in any transaction.

- Reduce fraud: Instantly track and document any abnormal or suspicious transactions
- Efficient: Analyze and manage transactions in combined systems, instead of individual systems

XProtect Transact integrates with the following Milestone IP VMS platforms: XProtect Essential, XProtect Professional, XProtect Enterprise and XProtect Corporate.

XProtect® Smart Wall

XProtect Smart Wall for XProtect Corporate is an advanced add-on video wall product that provides supreme situational awareness in larger surveillance centers and offers configuration flexibility and hardware independence. For each Smart Wall you can create presets defining view layout and actual content. The preset layouts are easily populated by dragging-and-dropping camera icons or by using the powerful rules engine. XProtect Smart Wall supports any number or combination of monitors regardless of manufacturer.

- Freedom of choice: The system is hardware agnostic and runs on standard servers and displays
- Improves response time: You can manage large installations more efficiently by focusing on critical areas

XProtect® Central

XProtect Central is an add-on system for monitoring and alarm management. XProtect Central provides continuous monitoring of operational status and event-triggered alarms from the XProtect recording servers, video surveillance cameras and external devices. This powerful solution, ideal for alarm centers, gives you an instant overview of alarms and possible technical problems for immediate verification and troubleshooting to resolve incidents fast.

- Instant notification: Hierarchical multi-level maps make it easy to navigate and identify an incident location and the system entities that are involved
- Cuts through the clutter: Visual and audible alerts help make busy alarm centers more responsive

XProtect Central integrates with the following Milestone IP VMS platforms: XProtect Professional, XProtect Enterprise and XProtect Corporate.

XProtect® Analytics

XProtect Analytics enables effortless integration of multiple third-party video applications in a single, easy-to-manage user interface. A sophisticated query engine enables correlation of alerts and related video across different video analytics tools, providing a more accurate analysis that reduces the risk for false alerts. Both edge (camera) based and server based analytics applications are seamlessly supported.

- Intelligent – The video analytics interface is an intuitive operator tool for integrating third party analytics
- Improves situational awareness - You have an overview of alerts and corresponding video

XProtect Analytics integrates with the following Milestone IP VMS platforms: XProtect Professional, XProtect Enterprise and XProtect Corporate.

The Open Platform: a foundation for long-term success

Milestone XProtect acts as the powerful core of surveillance systems, providing the widest choice in third-party hardware components and integration with other business systems. It is the foundation enabling you to cost-effectively choose the best solutions for today and tomorrow.

About Milestone Systems

Founded in 1998, Milestone Systems is the global industry leader in open platform IP video management software. The XProtect platform delivers powerful surveillance that is easy to manage, reliable and proven in thousands of customer installations around the world. With support for the widest choice in network hardware and integration with other systems, XProtect provides world-leading solutions to 'video enable' organizations – managing risks, protecting people and assets, optimizing processes and reducing costs. Milestone software is sold through authorized and certified partners. For more information, visit: www.milestonesys.com
