Guard Tour Solutions

A guard tour system is an essential tool which enables to monitor if people assigned to a tour patrol task are completing their duties on time and at their correct locations. In summary the system makes it possible to know where and when the patrols were made.

- 1 Sensor area
- 2 LED indicator
- 3 Switch
- 4 Label Area
- 5 Flashlight
- 6 Anti-slip area
- 7 USB port

Benefits

RFID Checkpoint tags

Touchless RFID reading using a 125Khz frequency. Each tag has its own unique global identification number.

Impact Records

Aluminum alloy body featuring a molded protective rubber shell with silicone gel protecting the internal electronics against strong impacts. With this system, you get an autonomous and indestructible reader with zero maintenance.

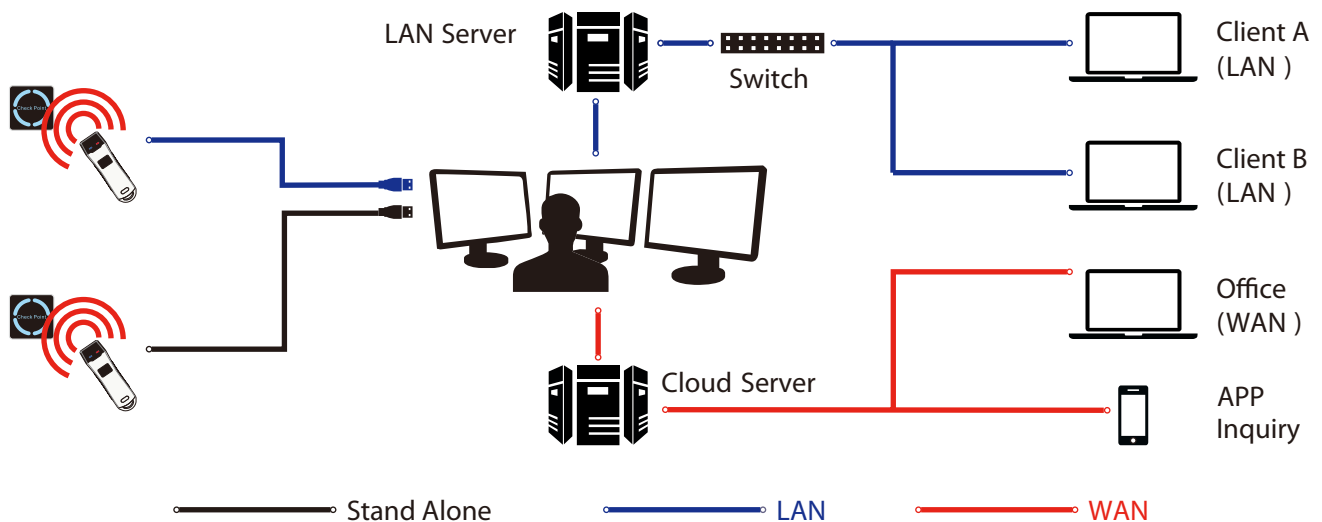

Lighting Extension

A reliable LED flashlight can be really helpful for those dark places on your Guard's patrol route.

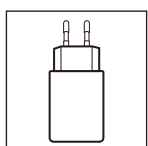

Technical Parameters

Model	Z-6200E
Lighting mode	Low, Medium, Strong, strobe and SOS
Reading technology	Read 125kHz EM(ID) tags proximity
Material	Aluminum alloy
Storage	80,000 pieces
Impact record	32,000 pieces
Workable temperature	-20 to 70°C
Workable humidity	30% to 90%
Communication	USB cable
Battery	3.7v built-in rechargeable li-ion battery
Prompt	LED + Vibration
Standard accessories	Data cable, safety protective cover, charger plug, software
Baud rate	115200 bps
Performance	IP 67, waterproof, shockproof
Dimension	130mm x 40mm x25mm
Net weight	170g
