

Power to Perform

Introducing the New Milestone Husky™ Series

By combining the power of Milestone XProtect® with reliable hardware and extensive support, the new Husky™ series gives you the Power to Perform.

Unleash your Power to Perform with New Husky™

The new generation of Milestone Husky video surveillance appliances exemplifies reliability, flexibility and ease of use, and comes backed by a global support network. It enables you to achieve much more with your video solution.

Optimized for XProtect® so that you can achieve more with your solution

Your video solution is only as good as the video management software (VMS) you use and the hardware it runs on. The new Husky optimizes several small — but important - details so you can get the most out of your Milestone XProtect VMS. Overall, it's the reliable choice for optimal performance.

From choosing units to installing and maintaining them, Husky is all about convenience.

The new Milestone Husky is pre-loaded with XProtect, saving you time on setup and installation. Just turn it on, add your XProtect license code, and it's ready to use.

The New Husky is easy to install, manage and service, taking the hassle out of installation and freeing up time to focus on other aspects of your project.

Be prepared for evolving needs with Husky's scalable range.

The new Husky series scales with you as your video management needs evolve. Use Husky with any XProtect product license, mix series units, and integrate more than 10,000 supported third-party devices to ensure the best fit today – and tomorrow.

Onsite support gives you peace of mind when you need it the most

Performance isn't just about the products. It's also about the people and the support behind them. The new Husky's performance and reliability are backed up a global team of support representatives as well as the possibility to access onsite support if needed.

Next level scalability and flexibility

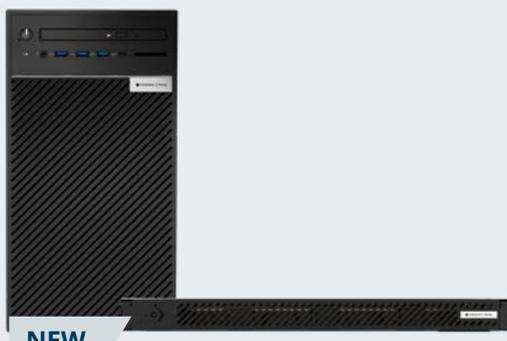

There's a Husky for your XProtect installation today – and tomorrow. The new Milestone Husky series offers a range of six video appliances covering a variety of use cases from simple setups in small sites such as in retail — all the way to larger, more complex installations such as critical facilities.

NEW

Milestone Husky 150D

Reliable and simple setup for smaller sites.

NEW

Milestone Husky 350T & 350R

The ideal setup for small installations, with the freedom to scale up.

NEW

Milestone Husky 700R

For continuous recording and full redundancy.

NEW

Milestone Husky 1000R

Achieve extra protection by ensuring 24/7 recording of large facilities.

NEW

Milestone Husky 1800R

Ultimate throughput and storage for when critical surveillance is needed.
